

## REC

### RUBBER NOZZLE WITH SPRING CLIP

The REC nozzle is highly suitable for Plymovent's fixed extractors and exhaust hose reels.

Recommended for today's trucks, private cars and especially vehicles with twin exhaust pipes. The REC is designed to take in ambient cooling air thereby reducing the exhaust emission temperature.

The nozzle is composed of moulded, high temperature resistant rubber. The REC is also equipped with an inner spring clip in order to strengthen the connection with the exhaust pipe.

The nozzle also includes a CO-outlet for measuring emission values.

#### SPECIFICATIONS

■ Physical dimensions and properties	
Material	rubber
Colour	black
Temperature resistance	150°C/300°F continuously
■ Scope of supply	
REC Rubber nozzle with spring clip - Exhaust pipe - Exhaust hose	
■ Order information	
Refer to remaining specifications	
■ Shipping date	
Gross weight	see remaining specifications
Harmonized Tariff Code	8421.39.8090
Country of origin	Sweden
